

Project Title : AI-Powered University Academic Management Platform

Name: Md Mohseen Molla

Student ID: 251035003

1. Introduction

The purpose of this project is to develop an AI-Powered University Academic Management Platform that helps universities manage students, teachers, courses, attendance, results, and academic activities efficiently.

Scope

The system will provide:

- Student Management
 - Teacher Management
 - Course Management
 - Attendance Management
 - Result Management
 - Notice Management
 - AI Academic Assistant
 - Report Generation
-

2. Users of the System

Admin

- Manage students
- Manage teachers
- Manage courses
- Publish notices
- Generate reports

Teacher

- Take attendance
- Upload results
- View student information

Student

- View courses
 - View attendance
 - View results
 - Use AI assistant
-

3. Functional Requirements

FR-01 Login System

Users can log in using their username and password.

FR-02 Student Management

Admin can add, update, delete, and search students.

FR-03 Teacher Management

Admin can add, update, and delete teachers.

FR-04 Course Management

Admin can create and manage courses.

FR-05 Attendance Management

Teachers can record attendance and students can view attendance.

FR-06 Result Management

Teachers can upload results and students can view results.

FR-07 Notice Management

Admin can publish notices for students and teachers.

FR-08 AI Academic Assistant

Students can ask academic questions and receive AI-generated responses.

FR-09 Report Generation

The system can generate attendance and performance reports.

4. Non-Functional Requirements

Performance

The system should respond within 3 seconds.

Security

Only authorized users can access the system.

Reliability

The system should be available at all times.

Usability

The interface should be simple and user-friendly.

5. Use Cases

Student

- Login
- View Courses
- View Attendance
- View Results
- Chat with AI Assistant

Teacher

- Login
- Manage Attendance
- Upload Results

Admin

- Login

- Manage Students
 - Manage Teachers
 - Manage Courses
 - Publish Notices
 - Generate Reports
-

6. Future Scope

- Mobile Application
 - Online Examination System
 - AI-Based Career Guidance
 - AI Performance Prediction
-

7. Conclusion

The AI-Powered University Academic Management Platform will automate university academic processes and provide intelligent academic support through AI technology.
